3. To Create awareness through various examples to become entrepreneurship.

4. To promote students to think about incubation.

11. **Benefits in terms of Learning/ Skill/ Knowledge Obtained: -**

Entrepreneurs interested in exploring the incubator concept can request information from several sources, including the Small Business Administration, area economic development agencies, area educational institutions, or the National Business Incubation Association.

Would-be small business owners should have a complete business plan in hand before applying for entrance into an incubator program. Most incubators maintain a stringent screening process to ensure that their resources are put to the best possible use.

Entrepreneurs who are considering membership in an Internet incubator should study the benefits and drawbacks closely before making a final decision. Potential other sources of funding and assistance should be explored, as well as the level of autonomy that is present in the program. In addition, entrepreneurs should examine whether their e-business is prepared to take advantage of the incubator's ability to accelerate the launch process. Analysts note that speed to market is of little benefit if you do not have a complete, focused business plan in place. Finally, entrepreneurs need to objectively weigh whether increased speed to market is worth giving up a piece of the company.
