ABOUT THE EVENT : Outcome based education (OBE) is a student-centered instruction model that focuses on measuring student performances through outcomes. Outcomes include knowledge, skills and attitudes .Its focus remains on evaluation of outcomes of the program by stating the knowledge, skills and behaviour a graduate is expected to attain upon completion of the program and after 4-5 years of graduation. In the OBE model, the required knowledge and skills sets for a particular engineering degree is predetermined and the students are evaluated for all the required parameters during the course of program.OBE can primarily be distinguished from traditional education method by the way it incorporates three elements: theory of education, a systematic structure for education and a specific approach to instructional practice.
